

A \$485m take-private, underwritten without multiple expansion.

B2B SaaS platform in workflow automation • 850+ enterprise clients • 118% net revenue retention. Returns come from EBITDA growth and a 100% cash sweep, not from a richer exit.

SOURCES • \$501.7M TOTAL

Sponsor equity \$220.5m • 44.0%	Term Loan B \$169.6m • 33.8%	Unitranche \$72.7m • 14.5%	PIK notes \$24.2m • 4.8%	Mgmt rollover \$14.5m • 2.9%
---	--	--	--	--

Three tranches, 55% LTV, 10.2× of entry leverage.

TRANCHE	AMOUNT	× EBITDA	PRICING	ALL-IN	AMORTISATION
Term Loan B	\$169.6m	6.5×	SOFR + 350	8.8%	1% amort + 100% cash sweep
Unitranche / 2nd lien	\$72.7m	2.8×	Fixed	8.5%	Bullet, repaid at exit
PIK toggle notes	\$24.2m	0.9×	PIK	8.5%	Accretes to principal
Sponsor equity	\$220.5m	—	Equity	—	Residual funding, 93.8% of pro-forma equity
Management rollover	\$14.5m	—	Equity	—	3% of EV, plus a 10% MIP pool on gains

USES		STRUCTURING NOTES		
Purchase enterprise value	\$484.7m	SOFR modelled at 5.3% against ~4.3% current — the floating leg is deliberately punitive. The PIK toggle preserves roughly \$2m of cash a year in a stress case, and the TLB is covenant-lite with a 100% excess-cash-flow sweep that repays \$80.6m of principal over the hold.		
Transaction fees (2.0%)	\$9.7m			
Financing fees (1.5%)	\$7.3m			
Total uses	\$501.7m	INTEREST COVER Y1	INTEREST COVER Y5	CASH INTEREST PAID
		1.53×	3.73×	\$94.3m
		EBITDA / cash interest	cover more than doubles	cumulative over the hold

EBITDA doubles, leverage falls from 10.2× to 3.2×.

REVENUE CAGR
16.1%
\$48m → \$101m, decelerating 22% → 11%

EBITDA MARGIN
57.5%
up from 54.5% on G&A leverage

EBITDA GROWTH
2.2×
\$26.2m → \$58.3m over five years

DEBT REPAYED
\$80.6m
100% excess-cash-flow sweep

EBITDA growth pays for the deal. The exit multiple fights it.
